

**DECLARATION OF EMERGENCY**

Department of Environmental Quality  
Office of Environmental Assessment  
Environmental Planning Division

Remediation of Sites with Contaminated Media  
(LAC 33:V.109.*Hazardous Waste Definition*) (HW084E3)

In accordance with the emergency provisions of the Administrative Procedure Act, R.S. 49:953(B), which allows the Department of Environmental Quality to use emergency procedures to establish rules, and under the authority of R.S. 30:2011, the secretary of the department hereby declares that an emergency action is necessary in order to implement rules to address the remediation of sites with contaminated environmental media.

This is a renewal of Emergency Rule HW084E2, which was effective April 6, 2004, and published in the *Louisiana Register* on April 20, 2004. The department is drafting a rule to promulgate these regulation changes.

Current regulation causes contaminated environmental media to retain the description of having RCRA-listed waste “contained-in,” therefore slowing the remediation of the site or possibly halting it completely due to administration and disposal issues. This rule will remove a regulatory hurdle that deters site remediation. The incentive to remediate pollution stems from the resulting substantially reduced disposal and transportation costs for contaminated environmental media that are not required to be managed in the same manner as hazardous waste. Language has been added to further define the management of contaminated media as nonhazardous. The rule will also result in simplification of the waste handling process by reducing administrative requirements and providing greater consistency with non-RCRA waste handling requirements and practices. This will provide strong motivation to initiate and accelerate voluntary remediation of contaminated sites without increasing risks to human health or the environment.

This Emergency Rule is effective on August 4, 2004, and shall remain in effect for a maximum of 120 days or until a final rule is promulgated, whichever occurs first. For more information concerning HW084E3 you may contact the Regulation Development Section at (225) 219-3550.

Adopted this 3rd day of August, 2004.

Mike D. McDaniel, Ph.D.  
Secretary

## Title 33 ENVIRONMENTAL QUALITY

### Part V. Hazardous Waste and Hazardous Materials

#### Subpart 1. Department of Environmental Quality—Hazardous Waste

#### Chapter 1. General Provisions and Definitions

##### §109. Definitions

For all purposes of these rules and regulations, the terms defined in this Chapter shall have the following meanings, unless the context of use clearly indicates otherwise.

\* \* \*

*Hazardous Waste*—a solid waste, as defined in this Section, is a hazardous waste if:

1. - 2.c.vii. ...

d. it consists of environmental media (soil, sediments, surface water, or groundwater) that contain one or more hazardous wastes listed in LAC 33:V.4901 (unless excluded by one of the exclusions contained in this definition) or that exhibit any of the characteristics of hazardous waste identified in LAC 33:V.4903. Environmental media no longer contain a hazardous waste when concentrations of the hazardous constituents that serve as the basis for the hazardous waste being listed (as shown in LAC 33:V.4901.Table 6, Table of Constituents that Serve as a Basis for Listing Hazardous Waste, or if constituents are not listed in Table 6 refer to LAC 33:V.2299 [formerly Chapter 22, Appendix] for appropriate constituents, or if not listed in either of these locations shall be determined by the department on a case-by-case basis) remaining in the media are below applicable RECAP Screening Standards (LAC 33:I.Chapter 13) and the media no longer exhibit any of the characteristics of hazardous waste identified in LAC 33:V.4903. However, Land disposal restrictions-treatment standards (LAC 33:V.2299 [formerly Chapter 22, Appendix] Chapter 22) apply prior to placing such environmental media into a land disposal unit even though the media may no longer contain a hazardous waste.

de. Rebuttable Presumption for Used Oil. Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste because it has been mixed with halogenated hazardous waste listed in LAC 33:V.4901. Persons may rebut this presumption by demonstrating that the used oil does not contain hazardous waste (e.g., by using an analytical method from LAC 33:V.Chapter 49.Appendix A to show that the used oil does not contain significant concentrations of halogenated hazardous constituents listed in LAC 33:V.3105.Table 1).

i. The rebuttable presumption does not apply to metalworking oils/fluids containing chlorinated paraffins, if they are processed, through a tolling agreement, to reclaim metalworking oils/fluids. The presumption does apply to metalworking oils/fluids if such oils/fluids are recycled in any other manner or disposed.

ii. The rebuttable presumption does not apply to used oils contaminated with Chlorofluorocarbons (CFCs) removed from refrigeration units where the CFCs are destined for reclamation. The rebuttable presumption does apply to used oils contaminated with CFCs that have been mixed with used oil from sources other than refrigeration units.

3. - 6.b. ...
